

An Element to Fit Your Function

Industry-leading performance that stands up to even the most punishing environments and keeps your equipment running within permitting limits for longer.

First three-way catalyst in the industry with field-proven methane reduction performance.

Propane oxidation catalyst provides superior VOC destruction, unmatched by previous offerings.

From cost-conscious to performance-minded applications and everything in between, there is an Apex catalyst to meet your needs.

SUPERB PERFORMANCE AND DURABILITY

Apex is the Industry's Best Catalyst

- ❑ Combines the expertise, manufacturing experience, and production innovation from MIRATECH and Powertherm to create the industry-leading elements.
- ❑ Apex Three-Way Catalyst is the industry's first catalyst with demonstrated methane destruction in long-term field trial testing.
- ❑ Apex Propane Oxidation catalyst delivers best-in-class VOC destruction.
- ❑ Best durability, washability, and lowest lifecycle costs in the market.
- ❑ Compatible with all new and existing housings.
- ❑ Wide range of shapes, sizes, and formulations to match customer needs.

Complete Life Cycle Maintenance

CATALYST LIFECYCLE

Instead of an expensive catalyst replacement, MIRATECH can restore the performance of existing catalysts with a chemical wash and verify that performance with MIRATECH's Multi-Lambda Catalyst Test System (MLCTS®), all while providing the best customer service.

Guided by decades of catalyst development experience, a carefully controlled chemical washing process to reinvigorate old and dirty catalysts can keep you within permitting limits longer.

MIRATECH offers reclamation credit when a catalyst has reached the end of its service life. Precious metals such as platinum, palladium and rhodium can be recovered and redeemed for monetary value toward your next Apex catalyst purchase. Contact MIRATECH to learn more.

FIELD-PROVEN METHANE REDUCTION

The Apex three-way catalyst with a three-year performance warranty is the first and only three-way catalyst in the industry with field-proven methane reduction performance, substantially lowering methane emissions in the first year.

LOCALIZED INVENTORY

When you need a replacement element quickly, MIRATECH's localized inventory provides a fast solution. Our facilities, located in key and strategic markets throughout North America and the world, are stocked and ready to ship to get your equipment back up and running.
